

## Corporate Health Services

### Drug and Alcohol Testing Program

DMH Corporate Health Services has developed a high quality Drug and Alcohol Testing Consortium Program that is designed to meet the minimum requirements under DOT Federal Regulations 49 CFR Part 40.

DMH Corporate Health Services allows your company to be more productive through minimizing your involvement and providing your company with the assistance and expertise of our knowledgeable staff. Our program will keep you in compliance with the drug and alcohol testing regulations established by the Department of Transportation. DMH Corporate Health Services is capable of meeting your company's needs, regardless if you are a small employer or a large company we can facilitate a program for you.

**The FMCSA requires a CDL driver operating a vehicle with a Gross Combination Weight Rating of 26,001 lbs or more be enrolled in a Drug and Alcohol testing program. The same requirement exists for: drivers of all commercial vehicles hauling 16 or more passengers; and any size commercial vehicle transporting hazardous materials which requires a placard on the vehicle.**
